Ranger International Management ("Ranger") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with GIPS standards. Ranger has been independently verified by Ashland Partners and Company for the periods June 1, 2010 through September 30, 2016 and by ACA Performance Services, LLC for the periods October 1, 2016 through December 31, 2018.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Ranger International Composite has been examined for the periods from June 1, 2010 through December 31, 2018. The verification and performance examination reports are available upon request.

Notes:

- Ranger is an investment adviser registered with the United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940. The Ranger International Composite (the "Composite") includes all fully discretionary, fee paying accounts, which invests, on a long basis only, in a diversified group of approximately 30 to 50 international equity securities from both developed and developing markets, **excluding** U.S. based company securities. The Composite creation date is June 1, 2010. In addition, a performance examination was conducted on the Composite beginning June 1, 2010. A complete list and description of composites are available upon request.
- For comparison purposes, the Composite is measured against the MSCI AC World Ex USA Index (the "Index"), a widely recognized index which is designed to provide a broad measure of stock performance of developed and emerging markets throughout the world, with the exception of U.S.-based companies. Unlike the Index, Composite portfolios are actively managed and invest in a relatively concentrated group of approximately 30 to 50 holdings. Accordingly, comparing or contrasting Composite results or characteristics with those of the Index may be of limited use. Performance results of the Index include the reinvestment of dividends and income.
- Composite returns are presented (1) gross and net of management fees, (2) gross of foreign withholding taxes on dividends, interest income and capital gains, and (3) include the reinvestment of all dividends and income. Net of fee performance was calculated using the highest management fee equal to an annual rate of one percent (1.00%) of the capital account balance. The current fee schedule for the composite is one percent (1.00%) for the first \$25mm in AUM; Eighty-five basis points (0.85%) for the next \$50mm in AUM; Seventy basis points (0.70%) between \$75-150mm in AUM; and AUM Over \$150mm is fifty basis points (0.50%). Investment advisory fees incurred by clients may vary. Valuations are computed and performance is reported in U.S. dollars. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- Internal dispersion is calculated using the asset-weighted standard deviation of all portfolios that were included in the Composite for the entire year.
- Performance periods of less than 12 months are not annualized. Year 2010 results commenced on June 1, 2010.
- The Composite is re-valued and accounted for following a ten percent (10%) or greater cash inflow and outflow so as not to distort performance.
- Total IntG Assets include this Composite's assets as well as other international style assets managed by Ranger. ACA has not reviewed the total strategy assets or percentage of assets in the disclosure presentation.
- Ranger makes no representation, and it should not be assumed, that future investment performance will be profitable or will conform to past performance. Gross performance returns presented herein will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. The collection of fees produces a compounding effect on the total rate of return net of management fees. As an example, the effect of investment management fees on the total value of a client's portfolio assuming (a) quarterly fee assessment, (b) \$1,000,000 investment, (c) portfolio return of 8% a year, and (d) 1.00% annual investment advisory fee would be \$10,416 in the first year, and cumulative effects of \$59,816 over five years and \$143,430 over ten years. Actual performance results of client accounts may differ substantially.
